Help you succeed in southwest autopart market

The Fifth CAPAS Chengdu will be grandly opened on May 24-26, 2018 in Chengdu Century City New International Exhibition Center. The exhibition area reaches 45,000 square meters and it is expected to usher more than 800 exhibitor enterprises and attract 20,000 professional visitors and buyers from the world.

The one-stop platform of commerce and trade, communication and investment for the auto industry in the southwestern China

According to data of Chengdu finished vehicle production in the first half of 2017, the finished vehicle production reached 590,000, with an increase by 12.6% to 66,000. In the past five years, the compact cars in Chengdu increased more than 430,000 on average every year, the average annual growth rate at about 17%. By the end of July 2017, the compact car PARC topped 4.32 million, ranking second in China. The auto industry has become one of the dominant industries in Sichuan Province. As the automobile consumption market shifts from east to west, Sichuan, located in the southwest hinterland, has come up to the forward position in the strategic layout of many enterprises.

Create a new dedicated zone to meet your diverse needs

Through development in the southwest market for many years, 2018 CAPAS will continue the end consumer demand orientation of the last session, and build six dedicated zones by integrating the flat channel, diverse procurement modes and contents and other trends.

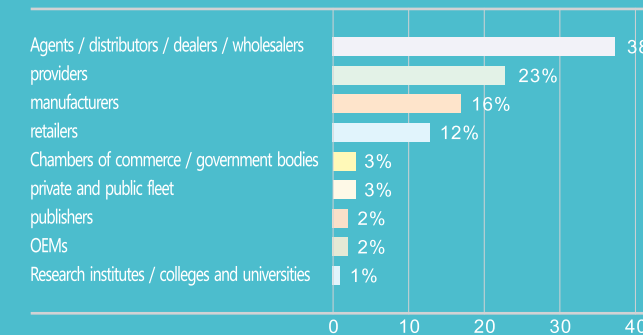

In 2017, the overall satisfaction of the visitors up to 93%.

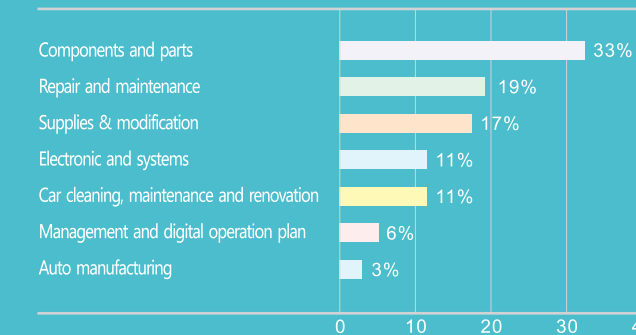

Since its inception, CAPAS has been committed to improving its leading role of one-stop sourcing platform in the automotive industry in the southwestern China. This year, the efforts have been made to further deepen the visitor organization, attracting professional visitors from 16 countries and regions worldwide, 30 provinces and regions in the country. High quality buyer groups further promote the effectiveness of the exhibition.

Leading the new trend of new energy auto industry in western China

China (Chengdu) New Energy Vehicles Exhibition

It is required by the national strategy that production value of the new energy vehicles exceeds RMB 10 trillion in 2020. As one of the key industries in Sichuan Province, the new energy vehicles industry will see its production value break through RMB 100 billion in 2020. The world's top new energy vehicles are to be showcased in the new energy vehicles exhibition and manufacturers will bring the forefront technological innovation and vehicle models.

2018 China International Cooperation Conference on New Energy Vehicles

By virtue of the new opportunities from the reform of automobile industry, 2018 China International Cooperation Conference on New Energy Vehicles invite well-known experts and scholars in various fields of new energy vehicles industry, senior management of leading enterprises and government leaders and officials to jointly discuss how to enhance the core competitiveness of enterprises and cross-industry integration and innovation and how to strengthen exchanges and cooperation in the whole industry chain in face of the new situation, with the goal of achieving mutual benefits and win-win results.

Supply chain zone

With the twin-engine of the booming production and sale of automobiles and the sustainable growth in the car PARC in the southwest region, the efforts are made to help improve the supply of spare and accessory parts by original manufacturers and aftermarket supply chain in the region. The main exhibits are drive systems, chassis, car body, standard parts, electronic control systems, auto lamps, electrical systems, driver assistance systems, vehicle safety systems and charging accessories for comfortable electronic systems.

Automotive supplies hall

The products include refitted vehicles, modification materials, interior trim, cleaning and maintenance products, lubricating oils and lubricants, decoration, intelligent vehicle electronics, automotive interiors and modifications, automotive cultures and entertainment.

Quick repair and Vulnerable part zone

There will be branded quick service chains, maintenance equipment, tools, quick-wear parts (three filters, wipers, spark plugs, batteries, tires and so on), to create a one-stop sourcing platform of maintenance terminal.

Commercial vehicle zone

Trucks, buses, special vehicles and related accessories, to build the most influential commercial vehicle trading platform in the southwestern region.

Sichuan enterprises exhibition zone

Highlight the main demands of auto components/accessories and automotive aftermarket services in Sichuan and of the countries along "the Belt and Road" and improve the matching rate and exhibit the new energy vehicles in Sichuan, including vehicles, standard parts, electronic control system, lamps, electrical systems, self-driving travel guarantee services (car rental, rescue, compensation and detecting).
